

My Dear Loved Ones:

In Psalm 103:3, God says, "Who forgives all your iniquities, / Who heals all your diseases."

Notice that there is a difference between how God handles iniquity and disease. It is seen in how God dealt with David when he repented of his sin with Bathsheba. Forgiveness is immediate, but healing for the child was denied, even though David did seven days of prayer and fasting (2 Samuel 12:13-23). Fellowship with God is the most important thing. So, since fellowship with God is most important, and since sin destroys fellowship with God, suffering may deepen our fellowship with God (Hebrews 5:8; 12:11).

God healing diseases is a type of testimony in light of Deuteronomy 32:39.

Stop and thank God for forgiving ALL your sin. Thank God that some day all disease will be gone, especially the sin-sickness and its effects that we all face. May God help us to really rejoice in all the blessings of God's forgiveness!

Praying for you today, my loved ones.
